

Aviation investment intelligence that moves with you

Whether you are structuring deals, managing assets or evaluating risk, Cirium delivers high-frequency, granular aviation analytics for investors and asset managers to act with confidence.

POWER SUPERIOR DEAL OUTCOMES

Benefit from granular, asset-level intelligence that uncovers trends and signals missed in traditional analysis approaches. Cirium's proprietary aviation analytics enables investors to identify undervalued opportunities, anticipate market shifts and structure thoroughly researched deals. Whether you're allocating capital across equities, debt or infrastructure, our analytics deliver the clarity needed for optimized outcomes.

CREATE VALUE – FROM DEAL TO EXIT

Drive consistent value creation across the entire investment lifecycle. Cirium supports each stage—from acquisition and underwriting through to asset management and exit strategy. Enhance your due diligence with independent aircraft valuations and fleet composition analysis. Monitor performance in real time, mitigate risk with early warning indicators and optimize positive deal returns with market intelligence and scenario modeling.

DRIVE MULTI-STRATEGY INVESTMENTS

Support diverse investment approaches with authoritative aviation intelligence. Cirium's aviation insights power private capital placements, equity market timing and alternative asset strategies. Use advanced traffic and air fare trends, fleet utilization metrics and emissions data to inform investment decisions across public and private markets. Whether you're managing structured credit, co-investments, or infrastructure portfolios, Cirium helps you to align capital with high-conviction opportunities.

Cirium's data and analytics are critical for us to extract insights, make predictions and for data-driven decisions which go past traditional financial analysis. We use a range of Cirium's offerings from analytical tools to integration of data through cloud platforms for seamless decision making. Cirium's **fleet intelligence** is of high value to understand an airline's fleet, age and storage status. **Schedules** analysis enables us to track **flight routes and trends**, building a picture of **an airline's performance** and business plan. Furthermore, **Cirium's valuations** are extremely valuable to understand market trends and underlying reasons for value changes which is crucial for our analyses.

Capital Management Company

Future belongs to those who transform
Let us take you there

Trusted by the world's leading hedge funds, private equity firms and investors

Hedge Funds

Enable faster, sharper trade decisions through realtime insights, alternative data and custom analytics. Get an edge for timely, risk-informed decisions to seize opportunities and value dislocations before markets adjust.

Private Equity

Fast-track deal screening, diligence and postacquisition value creation with hard-to-source data, benchmarking tools and operational analytics. Enhance investment theses, operational KPIs and exit timing.

Institutional Investors

Deploy capital into aviation ventures that provide stable long-term, low volatility, asset backed returns. Cirium's aviation analytics provide long-horizon visibility, supporting fiduciary mandates and portfolio diversification across private equity, credit, infrastructure and real estate.

Credit Investors

Structure debt terms, manage downside risk and assess creditworthiness with confidence, using asset-level and real-time asset performance data. Cirium's granular analytics deliver insights to customize structuring and improve risk-adjusted returns in illiquid markets.

Investment Banks

Accelerate origination and deal execution with aviation intelligence that supports financing, structuring and syndication. Cirium's market intelligence, asset values and analytics support PE-backed M&A, direct lending transactions and capital raises for illiquid aviation strategies.

Benefits

- **Unified data access** – Access high-value analytics built from proprietary data sets including schedules, flights, fleet, traffic and fares—unavailable elsewhere in the market.
- **Integrated** – Benefit from interoperable, managed and seamlessly integrated analytics from a single data platform using robust delivery methods.
- **Single source of truth** – Confidently work from consistent data definitions, formats and metrics, enabling coordination across teams and the industry, saving time and costs.
- **Adapt during volatility** – Make quicker decisions with shared insights tailored for handling unforeseen changes and evolving market conditions.
- **Reliable analytics** – Cirium adopts stringent data processing protocols and thorough quality checks to build confidence in insights delivered.
- **Exceptional customer support** – Work with our globally positioned support team offering unrivalled round the clock assistance.
- **Aviation data experts** – Collaborate with our aviation data engineers and subject matter experts for guided data analytics per specific use – value right out of the box.
