

Market and risk intelligence in one place

Redefine aviation insurance with real-time and historical flight data, operational analytics, and aircraft and accident insights.

Specialist aviation data and analytics to navigate risk

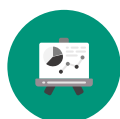

ENHANCE RISK EVALUATIONS

Harness flight and passenger intelligence, operational analytics and accident reports to refine risk assessments, optimize pricing strategies and streamline claims management for aviation insurers.

OPTIMIZE EXPOSURE ASSESSMENTS

Strengthen the analysis of portfolio risk, catastrophe modelling, and trend forecasting to improve exposure assessments, anticipate potential losses and fine-tune coverage terms with precision.

EMPOWER MARKET ANALYSES

Leverage advanced aviation data to develop superior market analyses, client risk profiling, more informed underwriting decisions, proactive claims advocacy and a competitive edge in aviation insurance.

Future belongs to those who transform
Let us take you there

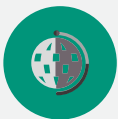

Trusted by the top 30 insurers and brokers

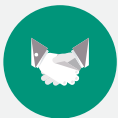

DIRECT INSURERS

Refine risk assessments, improve pricing strategies and streamline claims management with flight data, operational analytics and accident reports.
