

Powering Smarter Decisions for Modern Travel Management

In the travel management landscape, efficiency, traveler satisfaction, and duty of care are paramount. Travel managers need a comprehensive suite of data and analytics solutions to navigate disruptions, enhance client services, and drive operational excellence. By integrating the industry's most accurate aviation data, you can transform challenges into opportunities for superior service and strategic growth.

Smarter solutions for today's travel manager:

Real-Time Flight Status & Alerts:

Access live updates on flight status, delays, cancellations, and gate changes. Our proactive alerts notify you and your travelers of disruptions up to 72 hours in advance, allowing for timely intervention.

Automated Waiver Management:

Streamline the process of managing airline waivers. Our system automatically identifies affected bookings during disruption events and provides the necessary waiver information, reducing manual effort and ensuring policy compliance.

Trip & Itinerary Monitoring:

Gain a holistic view of a traveler's entire journey, not just individual flight segments. Monitor complex itineraries to provide seamless, end-to-end support.

Advanced Emissions Data:

Integrate accurate, forward-looking CO₂ emissions data into your booking and reporting tools. Empower clients to make sustainable travel choices and support their corporate ESG reporting requirements.

Comprehensive Data Analytics:

Leverage historical and predictive analytics on passenger traffic, route performance, and booking trends to advise clients on cost-effective travel policies and negotiate better supplier rates.

Let's work together to:

Enhance Duty of Care

Proactively identify travelers impacted by disruptions and provide immediate support, ensuring their safety and well-being.

Achieve ESG Goals

Advise corporate clients on sustainable travel policies by providing precise flight emissions data for informed decision-making and reporting.

Improve Client Satisfaction

Offer clients real-time updates and seamless rebooking options, strengthening your reputation as a reliable travel partner.

Increase Operational Efficiency

Automate manual processes related to disruption and waiver management, freeing up your agents to focus on high-value client interactions.

Cirium has the advantage:

Unrivaled Data Accuracy

Our data is curated from over 600 sources, covering 97% of scheduled flights worldwide. This ensures you operate with the most trusted and reliable information available.

Holistic Itinerary View

Cirium's Trip Alerts contextualize flight information within a traveler's full itinerary, a feature not offered by competitors like FlightAware or OAG. This enables superior duty of care and a more cohesive traveler experience.

Proactive Disruption Management

Unlike competitors who offer a 24-hour view, Cirium provides a 72-hour forecast for flight status and potential disruptions, giving you a critical head start in managing traveler support and better service recovery.

Consultative Partnership

We act as an extension of your team, offering expert guidance and flexible solutions to meet your specific development and client needs.

Our solutions are designed for seamless integration into your existing systems. Access our data through flexible APIs, custom feeds, or our cloud data warehouse to power your proprietary tools and workflows.

Take the Next Step

Ready to enhance your travel management services with industry-leading data? Speak with one of our experts to discover how Cirium can help you improve efficiency, traveler satisfaction, and compliance.
